

FOR IMMEDIATE RELEASE

March 3, 2021

Residents of LutherCare Communities receive first dose of COVID-19 vaccine.

Residents throughout LutherCare’s senior living communities have received the first dose of the COVID-19 Pfizer-BioNtech vaccine.

“We have been proactive and advocating for our residents to receive the vaccination on-site and early on during Phase 1 of the vaccine delivery program. We are also pleased to report the uptake to receiving the vaccine throughout our communities has been up to 100%,” Kelly Peevers, Vice-President of Housing. Peevers added, “Having our residents vaccinated is a significant support in our fight against COVID-19 as we strive to protect our most vulnerable citizens. However, we continue to be diligent as other measures such as physical distancing, good hand hygiene and wearing of masks continues to be required to prevent transmission.”

Residents at Luther Special Care Home and LutherCare’s Intermediate Care Homes have now been fully vaccinated for COVID-19.
